

PROTECT-O-BURN®

Application: Bulk Fuel Storage

PROBLEM STATEMENT

Bulk fuel stores, refineries and terminals all share as many characteristics as they don't. The core engineering is generally the same, but the terrain, location and climate is varied, and each setting has its own inherent benefits and risks. It's comforting to know there is a robust, trusted extinguishing agent in place to keep you protected, just about anywhere you may yourself.

DON'T FEAR IT - **FIGHT** IT!

Effective fire protection of your bulk fuel storage facility

WITH A UNIQUE FIRE FIGHTING FOAM TO WORK WITH, PROTECT-O-BURN CHALLENGES THE NORM, IN AN ONGOING QUEST FOR FIRE PROTECTION EXCELLENCE.

What can you do when you have **a lot** of top quality fire fighting foam that is **instantly** available, **anywhere** it may be required? To explain: you can think of a vessel of Protect-o-Burn fire fighting foam as being a giant pressurised extinguisher that can be placed anywhere you want, to protect (almost) anything you can imagine.

This makes it possible to install a unique fire fighting system which will produce super-large quantities of fire fighting foam to protect your facility, even in remote locations and in challenging climatic conditions. What's more, because a Protect-o-Burn fire systems does not require permanent water supply, you are double-protected against arson on your plant, and against sabotage on your external water sources, or in areas where you may be water-scarce.

PHILOSOPHY

We believe in:
Hitting a fire **EARLY**
Hitting a fire **FAST**
Hitting a fire **HARD**

This philosophy of applying overwhelming force has enabled us to meet and exceed all the relevant codes and standards, on every site in which we have carried out a special-risks, fire protection installation.

In one installation, a Protect-o-Burn system applies 473m³ of foam every minute over more than 3500 square meters of open-top fuel storage.

DETECTION

Flame and temperature detection are crucial for double-barrier protection of tank farms.

Temperature detection functions cheaply and robustly.

Flame detectors are excellent at rapid detection of fire.

MAINTENANCE, SUPPORT AND TRAINING

is included with every fire protection system purchased from Protect-o-Burn.

24 hour support is only a phone call away.
